

PRESS RELEASE

CodeFutures™ Announces FireStorm/DAO 2.2 BETA Program

[London , UK , June 15, 2004] CodeFutures has launched a BETA Program for Release 2.2 of its FireStorm/DAO code generation tool. "FireStorm/DAO 2.2 BETA1 adds support for generating full web applications based on Apache Struts and Tiles as a result of strong customer demand" says Andy Grove, CTO, CodeFutures. "This is an ideal way of providing data maintenance screens for Web projects without the overhead of manual coding".

Apache Struts JSP Client Generation

FireStorm/DAO 2.2 generates a complete JSP Web application for interacting with the generated DAO tier. The generated application is based on the Apache Struts framework and contains full functionality for inserting, updating, deleting, and searching records using the DAO tier. For each table, view, and custom DAO, the following artifacts are generated:

- Struts Actions for insert, update, and delete operations
- Struts Actions for each defined finder method
- ActionForm bean to represent DTO
- Relevant entries in struts-config.xml and tiles-defs.xml
- JSP pages for viewing and editing each DAO
- JSP pages for displaying input form and results page for each finder method

Struts is an Enterprise Edition feature.

FireStorm/DAO 2.2 BETA1 is available for immediate download and free evaluation from:

<http://www.codefutures.com/products/firestorm/download/>

FireStorm/DAO 2.2 is priced from \$195 per developer. There are no runtime deployment licensing fees.

About CodeFutures

CodeFutures is the leading supplier of Java software development products for advanced code generation. CodeFutures' major customers are leaders in industries that use high technology for competitive advantage, including mobile telecommunications (Orange), television (BSkyB and BBC Technology), corporate banking (Lehman Brothers), military systems (BAE and Lockheed Martin), ticketing and fare collection systems (CTS), electronic funds transfer (BACS), and energy (LUKOIL). CodeFutures is a privately held company based in London , United Kingdom .
