

## PRESS RELEASE

### CodeFutures opens first US office in Denver, Colorado

August 15, 2004: CodeFutures has opened its first office to serve the North American market near Denver, Colorado. "Over 75% of our customers are in the USA, so it's important to set up our first local office to support our primary market" says Andy Grove, CodeFutures CTO.

CodeFutures chose Denver as an ideal location to service both the Eastern and Pacific time zones from one location. The Denver region has been called a "Mile High Mecca" by Forbes magazine because of the high number of high technology companies in the area. Colorado state has the highest concentration of high technology workers in the US, with one in ten private sector workers employed in technology firms.

### About CodeFutures™

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes Java software developers more productive by generating the business logic for accessing relational databases in service-oriented and object-oriented architectures.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, BACS), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
