

PRESS RELEASE

CodeFutures Targets Independent Software Vendors with FireStorm/DAO OEM Edition

[Denver, CO, November 24, 2004] CodeFutures has shipped a Mac OS X version with Release 2.3 of its FireStorm/DAO code generation product for data persistence.

Dan Froelich, CodeFutures VP Sales, explains the reason for adding OS X support: "CodeFutures had many requests for an OS X version of FireStorm/DAO. The decision to support OS X was purely commercial. We have already signed up our first paying Mac customers just by providing a preview of Release 2.3."

The award-winning FireStorm/DAO makes Java software developers more productive by generating the business logic for accessing databases. The benefits provided by CodeFutures' code generation approach are higher developer productivity, better software quality, and lower maintenance costs.

FireStorm/DAO is available in Standard, Enterprise, and Architect editions. FireStorm/DAO Architect Edition allows new custom code generation templates to be developed and integrated with the FireStorm/DAO Studio environment. FireStorm/DAO Architect Edition includes the source code for the Java code generation templates.

Additional information on FireStorm/DAO is available here:

FireStorm/DAO is available for free evaluation from:

<http://www.codefutures.com/products/firestorm/download/>

The FireStorm/DAO product range is priced from \$195 per developer. FireStorm/DAO Architect Edition is priced at \$3,495 per developer. There are no runtime deployment licensing fees.

About CodeFutures Software

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes Java software developers more productive by generating the business logic for accessing relational databases in service-oriented and object-oriented architectures.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, JP Morgan), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint, SDS, IBM), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
