

PRESS RELEASE

CodeFutures Ships New Release of FireStorm/DAO Java Code Generator

[Denver, CO, November 24, 2004] CodeFutures has announced the General Availability of Release 2.3 of its FireStorm/DAO Java code generation product for data persistence.

The award-winning FireStorm/DAO makes Java software developers more productive by generating the business logic for accessing databases. The benefits provided by CodeFutures' code generation approach are higher developer productivity, better software quality, and lower maintenance costs.

"FireStorm/DAO makes development projects with changing or evolving business requirements much easier to handle. When database changes are made, FireStorm/DAO can be used to quickly regenerate code" explains PJ Murray, CEO, CodeFutures

FireStorm/DAO is available in Standard, Enterprise, and Architect editions. FireStorm/DAO Architect Edition allows new custom code generation templates to be developed and integrated with the FireStorm/DAO Studio environment. FireStorm/DAO Architect Edition includes the source code for the Java code generation templates.

The new FireStorm/DAO release provides usability improvements and wider third-party product support:

- broader OS support, adding Mac OS X and Linux to existing Windows and Unix support
- increased database support, including Sybase, Ingres, and MS Access
- improved product packaging, including a full installer and better documentation
- better JSP Struts and J2EE code generation

Additional information on FireStorm/DAO is available here:

FireStorm/DAO is available for free evaluation from:

<http://www.codefutures.com/products/firestorm/download/>

The FireStorm/DAO product range is priced from \$195 per developer. FireStorm/DAO Architect Edition is priced at \$3,495 per developer. There are no runtime deployment licensing fees.

About CodeFutures Software

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes Java software developers more productive by generating the business logic for accessing relational databases in service-oriented and object-oriented architectures.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, JP Morgan), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint, SDS, IBM), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
