

PRESS RELEASE

CodeFutures Q4 2004 Results: Many New Blue-Chip Corporate Customers

[Denver , CO , January 10, 2004] CodeFutures, the Java code generation tool vendor, today announced results for the fourth quarter 2004, confirming the recent trend in large organizations investing in code generation technologies. Some of the high-profile new customers in Q4 2004 included Bed Bath & Beyond, Credit Agricole, SingTel Mobile, Harvard Medical Center , FedEx, EDS Italia, Vonics, and Alliance Data Systems.

"I'm especially happy with signing SingTel Mobile as a customer because they have a great reputation in the telecommunications industry for innovation and use of advanced technology. The sector has been very quiet for the past few years and CodeFutures' has seen some signs of recovery, which is encouraging. We also signed Bell Canada this year" says PJ Murray, CEO, CodeFutures Software.

"Customers are the key driving force for new product features and functionality. Having such major corporations, with their heavy demands on information technology, is a major asset for driving CodeFutures' products forward to serve the enterprise market" says Andy Grove, CTO, CodeFutures.

"We're very pleased that many well known major corporations are investing in CodeFutures technology. It really adds credibility and commercial validation" says Dan Froelich, VP Sales, CodeFutures.

About CodeFutures Software

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes Java software developers more productive by generating the business logic for accessing relational databases in service-oriented and object-oriented architectures.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, BACS), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
