

PRESS RELEASE

CodeFutures Announces Technology Partnership with seeMore Technologies

[Denver, CO , September 30, 2005] CodeFutures has integrated its FireStorm/DAO data persistence tool with the seeMore virtual database platform. The result is that enterprises can very quickly develop applications that require data from multiple data sources.

"The seeMore virtual database approach allows the real data to stay in situ and be accessed in real-time. There is no data warehouse with data replication problems. For Java developers using FireStorm/DAO, a virtual database looks and feels like a normal database." says PJ Murray, CEO, CodeFutures Software

"FireStorm/DAO really impressed me in the way it removed the complexity of working with Java Data Access Objects and provided an immediate ROI. It's a Java developer's dream tool." explains Phillip Carruthers, CEO, seeMore Technologies.

"The seeMore virtual database technology is remarkable in the way that it really looks and feels like a real database, despite the fact that the data can be spread out throughout an enterprise. The product is so well designed that it was very easy to integrate FireStorm/DAO with it." explains Andy Grove, CTO, CodeFutures Software

FireStorm/DAO is available in Enterprise , Architect, and OEM editions. FireStorm/DAO Architect Edition allows new custom code generation templates to be developed and integrated with the FireStorm/DAO Studio environment. FireStorm/DAO Architect Edition includes the source code for the Java code generation templates.

Additional information on FireStorm/DAO is available here:

<http://www.codefutures.com/products/firestorm/>

A video demonstration is available here:

<http://www.codefutures.com/library/FireStormProductDemo.wmv>

Additional information on Data Access Objects is available here:

<http://www.codefutures.com/data-access-object>

FireStorm/DAO is available for free evaluation from:

<http://www.codefutures.com/products/firestorm/download/>

The FireStorm/DAO Enterprise Edition is priced at \$595 per developer. FireStorm/DAO Architect Edition is priced at \$3,495 per developer. There are no runtime deployment licensing fees.

About seeMore Technologies

seeMore Technologies is a provider of Corporate Data Operating System(tm) technologies through its Virtual Database Server technology for Enterprise Information Integration. seeMore's mission is to address a growing phenomenon within today's business infrastructures - the proliferation of multiple data sources across single organizations, multiple locations, across the supply chain and on the Web, and the increased need to utilize this information as if it were a single data source. www.seemoretechnologies.com

About CodeFutures Software

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes software developers more productive by generating the Java code for accessing relational databases.

CodeFutures' code generation approach provides faster and cheaper application development, higher quality applications, more predictable and consistent results, faster software product development cycle times, faster time to market for commercial application development, reduced project costs, and reduced project risks. CodeFutures approach ensures that the focus of software developers is solving business problems.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, JP Morgan), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint, SDS, IBM), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
