

PRESS RELEASE

CodeFutures Software Forms Alliance with Rogue Wave Software

[London, UK, Dec 15, 2005] CodeFutures Software has announced a strategic alliance with Rogue Wave Software, a division of Quovadx, Inc. (Nasdaq: QVDX), focused on the creation of complementary development products for the recently-announced Rogue Wave Hydra framework.

"Rogue Wave Software has built a great reputation with professional software developers over the past 15 years. We're very happy to be closely associated with one of the software industry's most respected vendors of products for enterprise application development," said PJ Murray, CEO, CodeFutures Software.

The alliance activities include:

- CodeFutures will enhance its current FireStorm/DAO product to support Rogue Wave Hydra.
- CodeFutures and Rogue Wave Software will also jointly develop additional product components/tools that will be compatible with Rogue Wave Hydra. The new components will be targeted at professional developers that are building enterprise applications in Java and Service-Oriented Architectures.
- CodeFutures and Rogue Wave Software will engage in joint marketing and sales activities.

"We are very pleased to be working with CodeFutures Software. We hope that future jointly-developed products will be as successful as its popular FireStorm/DAO tool. We're particularly excited about the expertise CodeFutures can bring to Rogue Wave Software's entry into the professional Java developer market," explained Cory Issacson, president, Rogue Wave Software.

"Rogue Wave Hydra is a truly innovative solution that addresses the critical scalability and performance problems that many large enterprises are experiencing using traditional approaches like server farms. We're very happy to be associated with Rogue Wave Hydra," said Andy Grove, CTO, CodeFutures Software.

About Rogue Wave Software

Rogue Wave Software, a division of Quovadx, Inc. (Nasdaq: QVDX), provides reusable software components and services to professional developers for enterprise-class, high-performance application development. Today, thousands of developers at some of the world's leading companies have used Rogue Wave products to develop mission-critical applications. Rogue Wave Software operates throughout the United States, Europe and Asia. For more information, please visit <http://www.roguewave.com>.

Rogue Wave is a registered mark of Quovadx, Inc. All other company and product names mentioned may be trademarks of the companies with which they are associated.

About CodeFutures Software

CodeFutures is the leading supplier of Java software development products for advanced data persistence. The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes software developers more productive by generating the Java code for accessing relational databases.

CodeFutures' code generation approach provides faster and cheaper application development, higher quality applications, more predictable and consistent results, faster software product development cycle times, faster time to market for commercial application development, reduced project costs, and reduced project risks. CodeFutures approach ensures that the focus of software developers is solving business problems.

CodeFutures' products are used by professional Java developers in major corporations such as Turner Broadcasting, Lehman Brothers, JP Morgan, Kraft Foods, FedEx, Bed Bath and Beyond, Lockheed Martin, Suzuki, EMC, Macromedia, and Siemens.
